Summary

AI Engineer and Computer Science undergraduate specializing in **Agentic AI**, **LLM orchestration**, and **RAG pipeline engineering**. Proven builder of production-grade multi-agent systems using LangGraph, LangChain, FastAPI, and pgvector. Experienced in end-to-end machine learning system design, from embedding generation and vector search to real-time API deployment and SaaS productization.

Education

Bachelor of Technology – Computer Science and Engineering

Krishna Institute of Engineering and Technology, Ghaziabad, Uttar Pradesh

Expected May 2028

CGPA: 8.02 / 10.0

Technical Skills

Languages: Python, C++, SQL, C

AI and ML: Agentic AI, Multi-Agent Orchestration, RAG Pipelines, NLP, Generative AI, Word Embeddings, Vector Similarity Search, Deep Learning

Frameworks and Tools: LangGraph, LangChain, LangSmith, FastAPI, Next.js, React.js, Node.js, Prisma ORM

Databases and Vector Stores: PostgreSQL, Supabase, FAISS, ChromaDB

Infrastructure and APIs: Meta Graph API, Webhooks, Cloudflare Tunnel, Vercel, REST APIs

Data and Visualization: MS Excel (Advanced), Power BI, Tableau

Projects

ReplyPilot AI | *LangGraph · FastAPI · Supabase pgvector · Ollama · Meta Graph API · Next.js*

Jun 2026

- Architected a production agentic SaaS for Instagram automation, handling 100+ daily comment replies and eliminating manual response time entirely.
- Engineered a RAG pipeline using Supabase pgvector and Ollama embeddings, cutting irrelevant LLM calls by 40% through intent-based routing.
- Integrated Meta Webhook and Graph API with Cloudflare Tunnel, achieving sub-5-second end-to-end reply latency in production.

VidyaSetu – AI-Powered Student Intelligence Platform | *Next.js · Prisma · PostgreSQL · LLM · REST APIs*

May 2026

- Led development of the official Computer Science Department platform, serving 500+ students with centralized profile and placement data.
- Designed and analyzed an automated assessment system, combining GitHub, LeetCode, and academic data into one objective performance metric.
- Automated LLM-based resume parsing into PostgreSQL, eliminating manual entry and reducing profile setup time by 70%.

Certifications

- Machine Learning Specialization** – Coursera / DeepLearning.AI
- Generative AI with LLMs** – Coursera / DeepLearning.AI

Co-Curricular Activities

- Hackathon Participant** – Built AI-driven full-stack prototypes at multiple hackathons using ML, NLP, and vector embeddings; delivered functional solutions under constrained timelines (2025 – 2026).
- Hackathon Organizer** – Organized multiple hackathons including a national-level event; managed end-to-end technical coordination and execution (2024 – Present).
